DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1) Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Viazmensky (5,292,581) or Win (5,667,635). The prior art shows a wet wipe in which the fiber substrate has been treated with a wet strength agent such as polyamide-epichlorohydrin resins, which corresponds to the claimed "chemical blocking material". The claims recite a lower limit of 2.1 weight percent of the chemical blocking material. This lower limit is not critical as evidenced by the fact that as little as 1% by weight can be used. Obviously, one could use more wet strength agent. In fact Win clearly teaches as much as 3% wet strength agent can be used in making a wet wipe (col. 3, lines 39-44). Cationic lotions for wet wipes are admitted by Applicant to be old, see page 1 of the instant Specification. It would have been obvious to employ the claimed cationic lotion in the wet wipe of Viazmensky or Win.
